### Conclusions

Until [17] the GF was amended by further items (which is not such a big risk), that is why I use this in auditing since 2005. See [26] and [27].

[18] and later have been squirreled and are thus refused by me.

[14a] XGF is not compatible to [17], thus unlogical and introduces confusions. So I adjusted it in 2005 to [17]. But I assume, that the GF was already alter-ised in 1974, so one should go back even further if the issues would be available.

**[7] seems to be the best issue.** Because LRH based his class 8 lecture of 28. 9. 1968 STANDARD GREEN FORM AND RUDIMENTS on this issue and from this stems its authority. It is mentioned in the HCOPL-Index as a valid issue and is 6 pages long. All later issues are changes by staff and the LRH issue authority is missing. And luckily we have an issue of that. **So we are on the safe side with it.** About this issue the footnote in the old Red Vol VI, says on pg 226:

*“The above issue [7] was amended by HCO PLs dated 16 December 1968 (which changed the title to Green Form), 15 May 1969, 7 September 1969, 7 April 1970, and 8 August 1970, all of which were done by staff, not LRH.*

*A further revision was issued on 17 September 1974 which was revised by HCO PL 7 April 1970RA, Revised 29 September 1974, Green Form, which is in Volume VIII, page 321.”*
